

# Asbel Fernandez

## Information Technology

As a recent graduate with an Associate Degree in Information Technology and strong theoretical knowledge of programming languages such as C++ and JavaScript, I am eager to start my career as a programmer. I am 35 years old but possess a lot of energy and drive to learn and become proficient in programming. To showcase my skills, I have built a website portfolio featuring two projects that I have completed, which have given me hands-on experience in website development and allowed me to apply my programming knowledge in a real-world setting. I am confident that my theoretical knowledge and eagerness to learn and adapt make me a suitable candidate for any programming role and I am excited about the opportunity to work with a team of experienced professionals and contribute to the success of the organization.
